

Human Schwann Cells

Cat. No. ARP0103, 5×10^5 cells/vial

Description

Research on the Human Schwann Cells is essential to the study of Charcot-Marie-Tooth disease, Guillain-Barré syndrome, chronic inflammatory demyelinating polyneuropathy (CIDP), traumatic nerve injury, and schwannomas (including NF2-related vestibular schwannomas). The spinal cord is a long and cylindrical cord of nerve tissue enclosed in a tubular structure, called the spinal canal. It extends from the base of the brain to the lower back and acts as a communication channel that transmits nerve signals between the brain and the rest of the body. The Human Schwann Cells are to be used with Human Schwann Cell Medium (Cat. No. ACM0103). This product is intended for laboratory in vitro use only. It is not intended for diagnostic, therapeutic, or clinical applications.

Specification

Cell Type: N/A

Tissue/Organ: Peripheral nervous system (spinal nerve)

Disease: N/A

Species: Homo sapiens (Human)

Genetic Background: N/A

Markers: S100 β

Symbols: HSC

Shipping & Storage

Shipping condition: Frozen on dry ice.

Storage condition: Liquid nitrogen (LN₂) cryopreservation.

Intended Use

This product is intended for laboratory in vitro use only. It is not intended for diagnostic, therapeutic, or clinical applications.

Culturing Guidance

Morphology: N/A

Growth Mode: N/A

Temperature: 37°C

Atmosphere: 5% CO₂

Unpacking and Storage Instructions

1. Visually inspect all packaging components for integrity and verify adequate dry ice.
If any damage is observed, notify Ascent Technical Support immediately.
2. Prioritize transfer to liquid nitrogen vapor phase storage system (-130°C or below).
Secondary option: -80°C mechanical freezer (short-term storage only).
Always maintain temperature strictly below -65°C.

Disclaimer

Ascent Research endeavors to provide accurate and up-to-date product information. However, no warranties or representations are made regarding its completeness or reliability. References to scientific literature and patents are for informational purposes only, and the customer assumes sole responsibility for verifying their accuracy.

By accepting this product, the customer acknowledges and agrees to assume all risks associated with its receipt, handling, storage, disposal, and use, including compliance with all applicable safety and environmental regulations and precautions. Relevant laws, regulations, and ethical guidelines must be followed in conducting any research, modifications, or derivatives derived from this product.

This product is provided "AS IS", and except as expressly stated herein, Ascent Research disclaims all other warranties, express or implied. Under no circumstances shall Ascent Research, its affiliates, or representatives be liable for indirect, incidental, consequential, or punitive damages arising from the use of this material. While Ascent Research employs rigorous quality control measures, we shall not be held responsible for damages resulting from misidentification or misinterpretation of the provided materials.
