

Human Villous Mesenchymal Fibroblasts

Cat. No. ARP0131, 5×10^5 cells/vial

Description

Research on the Human Villous Mesenchymal Fibroblasts is essential to the study of placental fibrosis, gestational diabetes mellitus-related stromal dysfunction, villitis of unknown etiology (VUE), and chronic histiocytic intervillitis. The placenta is a temporary organ developed in the uterus during pregnancy. It attaches to the uterine wall and connects to the developing fetus by the umbilical cord. Through the umbilical cord, the placenta provides oxygen and nutrients to the fetus. The Human Villous Mesenchymal Fibroblasts are to be used with Human Villous Mesenchymal Fibroblast Medium (Cat. No. ACM0131). This product is intended for laboratory in vitro use only. It is not intended for diagnostic, therapeutic, or clinical applications.

Specification

Cell Type: Fibroblasts

Tissue/Organ: Placenta

Disease: N/A

Species: Homo sapiens (Human)

Genetic Background: N/A

Markers: Fibronectin, CD90

Symbols: HVMF

Shipping & Storage

Shipping condition: Frozen on dry ice.

Storage condition: Liquid nitrogen (LN₂) cryopreservation.

Intended Use

This product is intended for laboratory in vitro use only. It is not intended for diagnostic, therapeutic, or clinical applications.

Culturing Guidance

Morphology: Fibroblast-like

Growth Mode: N/A

Temperature: 37°C

Atmosphere: 5% CO₂

Unpacking and Storage Instructions

1. Visually inspect all packaging components for integrity and verify adequate dry ice.
If any damage is observed, notify Ascent Technical Support immediately.
2. Prioritize transfer to liquid nitrogen vapor phase storage system (-130°C or below).
Secondary option: -80°C mechanical freezer (short-term storage only).
Always maintain temperature strictly below -65°C.
