

Human Umbilical Artery Smooth Muscle Cells

Cat. No. ARP0175, 5×10^5 cells/vial

Description

Research on the Human Umbilical Artery Smooth Muscle Cells is essential to the study of umbilical artery contractility disorders, persistent fetal circulation, and hypoxia-induced vascular remodeling. The umbilical arteries are a pair of blood vessels in the umbilical cord, which connect the fetus to the placenta. The umbilical arteries transfer deoxygenated blood and waste from the fetus to the placenta. The Human Umbilical Artery Smooth Muscle Cells are to be used with Human Umbilical Artery Smooth Muscle Cell Medium (Cat. No. ACM0175). This product is intended for laboratory in vitro use only. It is not intended for diagnostic, therapeutic, or clinical applications.

Specification

Cell Type: Muscle Cells

Tissue/Organ: Umbilical cord (umbilical arteries)

Disease: N/A

Species: Homo sapiens (Human)

Genetic Background: N/A

Markers: α -Smooth Muscle Actin (α -SMA)

Symbols: HUASMC

Shipping & Storage

Shipping condition: Frozen on dry ice.

Storage condition: Liquid nitrogen (LN_2) cryopreservation.

Intended Use

This product is intended for laboratory in vitro use only. It is not intended for diagnostic, therapeutic, or clinical applications.

Culturing Guidance

Morphology: N/A

Growth Mode: N/A

Temperature: 37°C

Atmosphere: 5% CO₂

Unpacking and Storage Instructions

1. Visually inspect all packaging components for integrity and verify adequate dry ice.
If any damage is observed, notify Ascent Technical Support immediately.
2. Prioritize transfer to liquid nitrogen vapor phase storage system (-130°C or below).
Secondary option: -80°C mechanical freezer (short-term storage only).
Always maintain temperature strictly below -65°C.

Disclaimer
