

# Rabbit Epididymal Epithelial Cells

Cat. No. ARP0788,  $5 \times 10^5$  cells/vial

## Description

Research on the Rabbit Epididymal Epithelial Cells is essential to the study of epididymitis, obstructive azoospermia, post-vasectomy complications, and androgen deprivation effects. The epididymis is a long, coiled tube that connects the testis to the vas deferens. It lies adjacent to the testis and is primarily responsible for the storage, maturation, and transport of sperm in the male reproductive system. After being produced in the testes, sperm undergo further maturation and gain motility in the epididymis, which secretes fluid to provide nutritional and biochemical support for sperm. Abnormalities of the epididymis, such as inflammation or tuberculosis, may lead to pain, swelling, or infertility. The Rabbit Epididymal Epithelial Cells are to be used with Rabbit Epididymal Epithelial Cell Medium (Cat. No. ACM0788). This product is intended for laboratory in vitro use only. It is not intended for diagnostic, therapeutic, or clinical applications.

## Specification

Cell Type: Epithelial Cells

Tissue/Organ: Epididymis

Disease: Normal

Species: *Oryctolagus cuniculus* (Rabbit)

Genetic Background: N/A

Markers: Cytokeratin

Symbols: RaEEC

## Shipping & Storage

Shipping condition: Frozen on dry ice.

Storage condition: Liquid nitrogen (LN<sub>2</sub>) cryopreservation.

## Intended Use

This product is intended for laboratory in vitro use only. It is not intended for diagnostic, therapeutic, or clinical applications.

## Culturing Guidance

Morphology: Cobblestone-like, Polygonal

Growth Mode: Adherent

Temperature: 37°C

Atmosphere: 5% CO<sub>2</sub>

## Unpacking and Storage Instructions

1. Visually inspect all packaging components for integrity and verify adequate dry ice.  
If any damage is observed, notify Ascent Technical Support immediately.
2. Prioritize transfer to liquid nitrogen vapor phase storage system (-130°C or below).  
Secondary option: -80°C mechanical freezer (short-term storage only).  
Always maintain temperature strictly below -65°C.

## Disclaimer

Ascent Research endeavors to provide accurate and up-to-date product information. However, no warranties or representations are made regarding its completeness or reliability. References to scientific literature and patents are for informational purposes only, and the customer assumes sole responsibility for verifying their accuracy.

By accepting this product, the customer acknowledges and agrees to assume all risks associated with its receipt, handling, storage, disposal, and use, including compliance with all applicable safety and environmental regulations and precautions. Relevant laws, regulations, and ethical guidelines must be followed in conducting any research, modifications, or derivatives derived from this product.

This product is provided "AS IS", and except as expressly stated herein, Ascent Research disclaims all other warranties, express or implied. Under no circumstances shall Ascent Research, its affiliates, or representatives be liable for indirect, incidental, consequential, or punitive damages arising from the use of this material. While Ascent Research employs rigorous quality control measures, we shall not be held responsible for damages resulting from misidentification or misinterpretation of the provided materials.
