

Rabbit Adipose Microvascular Endothelial Cells

Cat. No. ARP0811, 5×10^5 cells/vial

Description

Research on the Rabbit Adipose Microvascular Endothelial Cells is essential to the study of trauma, infection, shock, tumors, diabetic wound healing disorders, pressure sores, and subcutaneous fibrosis. Adipose tissue is a form of connective tissue found throughout the body. It is located under the skin (as subcutaneous fat), surrounding internal organs (as visceral fat), and inside bone cavities (as bone marrow adipose tissue). Although it has long been recognized for its role in storing energy, insulating the body, and protecting internal organs, recent research has identified adipose tissue as an active player in the endocrine system. Adipocytes are used in research on obesity and metabolic disorders, endocrinology, inflammation, and immune response. The Rabbit Adipose Microvascular Endothelial Cells are to be used with Rabbit Adipose Microvascular Endothelial Cell Medium (Cat. No. ACM0811). This product is intended for laboratory in vitro use only. It is not intended for diagnostic, therapeutic, or clinical applications.

Specification

Cell Type: Microvascular Endothelial Cells

Tissue/Organ: Adipose

Disease: Normal

Species: *Oryctolagus cuniculus* (Rabbit)

Genetic Background: N/A

Markers: von Willebrand Factor (vWF)

Symbols: RaAMEC

Shipping & Storage

Shipping condition: Frozen on dry ice.

Storage condition: Liquid nitrogen (LN₂) cryopreservation.

Intended Use

This product is intended for laboratory in vitro use only. It is not intended for diagnostic, therapeutic, or clinical applications.

Culturing Guidance

Morphology: Cobblestone-like, Irregular

Growth Mode: Adherent

Temperature: 37°C

Atmosphere: 5% CO₂

Unpacking and Storage Instructions

1. Visually inspect all packaging components for integrity and verify adequate dry ice.
If any damage is observed, notify Ascent Technical Support immediately.
2. Prioritize transfer to liquid nitrogen vapor phase storage system (-130°C or below).
Secondary option: -80°C mechanical freezer (short-term storage only).
Always maintain temperature strictly below -65°C.

Disclaimer

Ascent Research endeavors to provide accurate and up-to-date product information. However, no warranties or representations are made regarding its completeness or reliability. References to scientific literature and patents are for informational purposes only, and the customer assumes sole responsibility for verifying their accuracy.

By accepting this product, the customer acknowledges and agrees to assume all risks associated with its receipt, handling, storage, disposal, and use, including compliance with all applicable safety and environmental regulations and precautions. Relevant laws, regulations, and ethical guidelines must be followed in conducting any research, modifications, or derivatives derived from this product.

This product is provided "AS IS", and except as expressly stated herein, Ascent Research disclaims all other warranties, express or implied. Under no circumstances shall Ascent Research, its affiliates, or representatives be liable for indirect, incidental, consequential, or punitive damages arising from the use of this material.
