

Pig Pancreatic Ductal Epithelial Cells

Cat. No. ARP0935, 5×10^5 cells/vial

Description

Research on the Pig Pancreatic Ductal Epithelial Cells is essential to the study of ductal obstruction, cystic fibrosis-related pancreatic disease, pancreatic ductal adenocarcinoma (PDAC) models, and autoimmune pancreatitis. The pancreas is an important gland in the digestive system. It is located in the abdomen, behind the stomach. It produces digestive enzymes to assist in breaking down food, and secretes insulin and glucagon to regulate blood glucose. Researchers often study its functions for endocrine disorders, such as type 1 and type 2 diabetes. The Pig Pancreatic Ductal Epithelial Cells are to be used with Pig Pancreatic Ductal Epithelial Cell Medium (Cat. No. ACM0935). This product is intended for laboratory in vitro use only. It is not intended for diagnostic, therapeutic, or clinical applications.

Specification

Cell Type: Epithelial Cells

Tissue/Organ: Pancreas

Disease: Normal

Species: *Sus scrofa* (Pig)

Genetic Background: N/A

Markers: Cytokeratin 19 (CK-19)

Symbols: PPDEC

Shipping & Storage

Shipping condition: Frozen on dry ice.

Storage condition: Liquid nitrogen (LN₂) cryopreservation.

Intended Use

This product is intended for laboratory in vitro use only. It is not intended for diagnostic, therapeutic, or clinical applications.

Culturing Guidance

Morphology: Cobblestone-like, Irregular

Growth Mode: Adherent

Temperature: 37°C

Atmosphere: 5% CO₂

Unpacking and Storage Instructions

1. Visually inspect all packaging components for integrity and verify adequate dry ice.
If any damage is observed, notify Ascent Technical Support immediately.
2. Prioritize transfer to liquid nitrogen vapor phase storage system (-130°C or below).
Secondary option: -80°C mechanical freezer (short-term storage only).
Always maintain temperature strictly below -65°C.
